Quality Espresso Link from **Quality Espresso** is a machine-to-machine system that provides real-time data remotely to managers. The system reports information such as the number of coffee cycles performed, malfunction alerts and the need for preventive maintenance, allowing users to obtain information from a virtual mobile network created with GSM technology. A global SIM card installed on the electronic chip of each machine receives and transmits information to a data platform. **Quality Espresso, Barcelona, Spain.** qualityespresso.net/en, info@qualityespresso.net

Zummo's Z40 professional squeezer is a juicer designed for hotels, restaurants and the mass catering industry. It handles peak business hours by squeezing up to 40 fruits per a minute. The juicer squeezes oranges, lemons, limes, grapefruits and pomegranates. A digital display panel indicates the machine's status, and an automatic filter makes operation easier. **Zummo, Moncada, Spain.** zummocorp.com, zummo@zummo.es
